

Reade

**YOUR TRUSTED PARTNER FOR
SOURCING SPECIALTY CHEMICALS**

1 About

With a legacy spanning 250 years, Reade Advanced Materials is a leading global specialty chemical distributor. Now in our fifth generation of family ownership, we've evolved from pharmaceutical chemist roots into a premier distributor, toll processor, and packager of high-tech chemical solids. What's the secret to our longevity? Taking care of our customers.

Our Focus: Your Success

Reade treats customers, employees, and business colleagues like family. We want you to focus on what matters most - your research, your development, or your business at hand. That's why our dedicated team is committed to handling everything from sourcing to processing and packaging for you.

Our Promise: Quality and Sustainability Excellence

We take care of you with an ISO 9001:2015 Certified Quality Management System and leading-edge chemical solids sourced from carefully vetted manufacturers in the United States and around the world. Reade is committed to expanding our network of suppliers who offer green and sustainable products. Our mission is to responsibly source the best-in-class specialty chemical solids through exceptional service and continual growth so our people, our partners, and our customers can keep innovating the future.

Our Industry Footprint:

Our clients range from NASA and General Dynamics to prestigious universities and laboratories worldwide. We welcome the opportunity to partner with your organization, as well.

2 Services

As a leading distributor, value-added toll processor and packager of specialty chemicals, Reade Advanced Materials is dedicated to providing you with end-to-end solutions and exceptional, knowledgeable service every step of the way.

Global Sourcing

When you partner with Reade to source your specialty chemicals, you access the knowledge and experience of an unmatched team of industry veterans. Reade makes it easy to streamline your purchasing, locate hard-to-find materials, secure competitive pricing, and proceed with confidence.

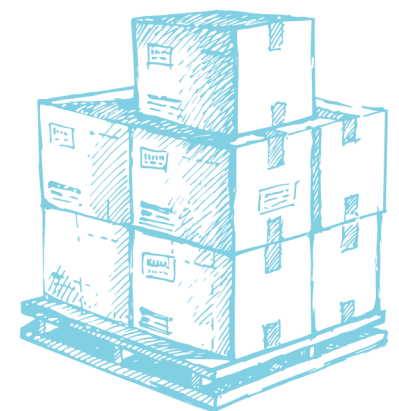

Custom Toll Chemical Processing

Once you have chosen the right specialty chemicals for your application through Reade, you can count on us for efficient toll processing, particularly in milling, drying, and blending for moderate to large production runs.

Custom Toll Packaging and Repackaging

Need packaging solutions? We offer full-service contract packaging of inorganic specialty chemical powder and granular products, including coarse granules, fine powders, creams, and pastes.

3 History

Scan the QR code to learn more about our rich history!

1773

The Reade Family industrial businesses were originally established in Wolverhampton, England, as Reade Brothers Co., Ltd. They manufactured pharmaceutical chemicals and varnishes.

1881

Ms. Elizabeth Reade, a successful industrial chemist, and her husband, William, relocated the family specialty chemical manufacturing business unit to New York City and renamed it Reade Manufacturing Co., Inc. (RMC). They quickly outgrew their space on Hudson Street and moved the RMC premises across the river to Grand Street in Hoboken, NJ.

1983

Mr. Charles Reade Sr. sold 100% ownership interest of the Metal Powder Division of RMC. RMC was later sold to a division of Magnesium Elektron, which has since been acquired by Luxfer. Later that year, Mr. Charles Reade Jr. established Reade Advanced Materials® as a new business unit. Today, it remains the historical Chemical Division of the family business as a distributor, toll processor, and packager of higher technology specialty chemical solids.

4 Sustainable Products

At Reade, we prioritize future generations and the world they'll live in. That's why we're continually working to expand our offering of green and sustainable products to advance sustainability in various industries such as cosmetics, agriculture, construction, and textiles. Our vast range of sustainable product materials, carefully sourced from renewable, bio-based, or recycled sources, make a positive impact on our environment and your innovations, reflecting our caring approach.

Featured Sustainable Products

- Aluminum
- Hemp Fiber
- Quartz
- Rice Hulls
- Walnut and Pecan Shells

The Reade Advantage

1. Strategic Collaboration: We take care of you with comprehensive capabilities that range from sourcing to processing and packaging, freeing you up to focus on your research, development, or business at hand. We're not just suppliers; we're partners invested in your success.

2. Tailored Solutions: We take care of you with exceptional service that's rooted in partnership and informed by deep knowledge and experience that connects you to the best solutions for your specifications.

3. Global Sourcing Network: We take care of you by utilizing an ISO 9001:2015 Certified Quality Management System and sourcing leading-edge chemical solids from carefully vetted manufacturers in the United States and around the world.

4. Proven Legacy: We take care of you because, as a family-owned and operated business since 1773, we've transformed from pharmaceutical chemists into a global powerhouse in specialty chemical distribution. Our longevity is your assurance of quality and reliability, and we never forget that our success is rooted in yours. We treat everyone - our employees, customers, and business colleagues, like family.

5. Experience Matters: We take care of clients ranging from NASA and General Dynamics to prestigious universities and laboratories worldwide. Leveraging over 200 years of knowledge, we've seen it all, and our experience will guide you to the best solutions for your specifications.

Partner with us to experience the Reade Advantage.

At **Reade**, we're not just a business, but a five-generation family legacy dedicated to innovation and unwavering service. When you partner with us, you become a part of our family, and your success becomes our success.

What's the secret to our longevity?

It's quite simple:
we take care of our customers.

6 Products

Reade offers a diverse portfolio of specialty chemical solids in powder, wire, sheet, and ingot form. Whether you need a small R&D quantity or full production lots, we'll work closely with you to ensure your needs are met.
